

Through our slow pyrolysis process, reSET™ is produced from sustainable organic wood biomass. reSET™ is 100% raw high quality pyroligneous acid (wood vinegar) with no additives or preservatives. reSET™ is absorbed through different parts of plants such as shoots, trunks, and leaves, strengthening the plants and brightening leaf, flower, and fruit pigment as well as increasing resistance to pests and diseases.

Benefits

- ✓ Adjusts soil & compost pH
- ✓ Organic and natural herbicide
- ✓ Organic and natural pesticide
- ✓ Increases pigments and brightens leaves, flowers, & fruit
- ✓ Improves flavor of sweet fruits
- ✓ Safe for human & animal health

reSET™

Use & Application

reSET™ contributes to a variety of different aspects of soil and vegetation quality and has a multitude of applications. It is an excellent herbicide/pesticide, pH adjuster, compost enhancer, and accelerates water treatment and landfarming.

Application Rates*

Application Type	Recommended preparation & application methods
<ul style="list-style-type: none"> • Seed germination • Enriching the soil • Control of fungal diseases & root rot • Repel nematodes 	<p>1:200 Dilution Ratio Dilute 1 part reSET™ in 200 parts water. Use solution as a spray applicator or directly to the soils. Apply prior to planting and throughout all stages of growth. Apply 1 L of solution per 1 m² [approx. 3 gal solution per 1 ft²].</p>
Seedlings & mature plants	<p>1:700 Dilution Ratio Dilute 1 part reSET™ in 700 parts water, foliar spray or root irrigation (first applied at the 2-leaf stage) at intervals of 15 days.</p>
<ul style="list-style-type: none"> • Stimulate compost production • Insect Infestation (natural pesticide) 	<p>1:50-100 Dilution Ratio Dilute 1 part reSET™ in 50 to 100 parts water to promote microbial activity in compost. Apply solution to all surface soils, leaves, stems and shoots showing signs of insect infestation.</p>
Improve flavor of sweet fruits and stimulate growth	<p>1:500 Dilution Ratio Dilute 1 part reSET™ in 500 parts water to improve plant metabolism and contribute to high fruit sugar levels.</p>
To control soil-based plant pathogens	<p>1:5-10 Dilution Ratio Use a strong dilution ratio by diluting 1 part reSET™ in 5 to 10 parts water as a natural pathogen control.</p>

*General guidelines. Application rates is dependent on crop type and geography. Adjustments may be necessary as soil and water quality vary both regionally and seasonally. Please contact us to discuss your specific application needs.
